PROFILE

Front-end developer with hands-on experience crafting mobile-first websites with semantic code from scratch. 5+ years experience in customer service demonstrating strong leadership, problem-solving, and people skills. Passionate about learning how to make the web more accessible through code and design, and contributing to the tech community through volunteering and mentoring.

TECHNICAL PROJECTS

freeCodeCamp Projects

A self-paced, online community teaching people how to code with a focus on Javascript and using web API's to create projects such as a Twitch Viewer or a Weather App

User Story-Based Development - Implemented features based on user stories provided Reverse-engineered given examples using JavaScript, HTML, CSS and Gulp.

Site Design - Designed in browser to make projects more functional and appealing with a mobile-first approach

Browser & Device Testing - Tested across devices and browsers to ensure functionality and consistency

BCIT Class Projects

Designed 9 websites during a 20-week program that incorporated HTML, CSS, jQuery, WordPress and PHP.

Client Relationship Management - Liaised with a small business client to identify needs and requirements to create targeted designs. Also offered hosting, domain name and WordPress support.

Project Management - Coordinated schedules, delegated tasks and assigned deadlines with up to three team members using GitHub

Architecture and Design - Researched competitor websites, developed information architecture, and developed mockups

Site Development - Created responsive sites and Wordpress themes focused on semantic code for better SEO. Used Git for version control and collaboration.

Site Testing - Implemented user testing and cross browser testing with support up to IE 10

WORK EXPERIENCE

FRONT END DEVELOPER

Aura West Makeup Artistry (aurawestmakeup.com)
March 2016

- Utilized a responsive grid framework using Susy with Underscores for better presentation across devices and browsers
- Expanded WordPress theme to include a blog layout and collaborated with a designer to ensure branding stays consistent throughout
- Optimized images and scripts for better performance

OFFICE ASSISTANT

Chop Steakhouse & Bar, Richmond BC
Apr 2014 - Aug 2015

- Effectively balanced daily sales by counting 4 floats, checking 15+ server cash outs, dispensing server tips, allocating tip pool percentages, and finding and correcting discrepancies by 2pm PST daily
- Established good rapport with partner hotel staff, various vendors, service providers, and Calgary home office payroll and AP departments to resolve discrepancies and invoicing issues
- Assisted managers with various tasks such as creating spreadsheets to track Groupon sales, taking reservations by phone, and contacting coworkers to solve scheduling issues

SIDE PROJECTS

Codevember 2016

Created CSS Drawings, animated those drawings, and tested out new CSS features

Momentum App Clone

Styled a Momentum App clone made by fellow freeCodeCamp members to mimic the original as close as possible. Responsive with CSS animations

freeCodeCamp Forums

Offering portfolio/project critique, advice, and resources to beginner coders
